

Educational Opportunities for GGC Staff and Faculty

Monthly Seminars

One the second Friday of each month, a seminar of interest is given by either a GGC faculty member or an invited guest speaker. Attendance at seminars is encouraged and open to all GGC staff and faculty.

Quarterly Case Reviews

Once each quarter, GGC clinicians, diagnosticians, researchers, educators, and administrators gather in-person and via teleconference to review patient cases. Attendance is expected of faculty members and all other staff are also welcome to attend.

[SC Genetics Conclave](#)

Conclave is a day- long educational event on GGC's Greenwood campus featuring invited guests and GGC faculty speakers sharing presentations and interesting case studies on a genetics topic. Attendees come from throughout the state. Again, GGC staff and faculty are encouraged to attend any or all presentations.

[Medical Genetics Training Program Graduate Course](#)

The Medical Genetics Training Program at GGC offers postgraduate training for PhD laboratory fellows and MD residents. As part of the training, fellows and residents are required to complete a Graduate Course in medical genetics taught by GGC faculty. GGC staff members are always invited to attend any of the course sessions in which they have an interest.
